

FIG. 2 is an exploded perspective view of a mechanical assembly. The assembly includes a main frame (20) with a base (38) and a vertical support (29). A handle (22) is shown at the bottom left, connected to a shaft (35) and a nut (36). A large circular component (24) is also shown. Various bolts (31, 32, 33, 34, 35, 36, 40, 43, 44, 45, 46, 46', 48, 49, 50, 53, 54, 55, 56, 58, 64) and washers (51, 52) are shown in their respective positions. A bracket (26) is attached to the vertical support (29). A plate (28) is shown at the top of the vertical support. A component (27) is shown at the top of the vertical support. A component (30) is shown at the top of the vertical support. A component (31) is shown at the top of the vertical support. A component (32) is shown at the top of the vertical support. A component (33) is shown at the top of the vertical support. A component (34) is shown at the top of the vertical support. A component (35) is shown at the top of the vertical support. A component (36) is shown at the top of the vertical support. A component (40) is shown at the top of the vertical support. A component (43) is shown at the top of the vertical support. A component (44) is shown at the top of the vertical support. A component (45) is shown at the top of the vertical support. A component (46) is shown at the top of the vertical support. A component (46') is shown at the top of the vertical support. A component (48) is shown at the top of the vertical support. A component (49) is shown at the top of the vertical support. A component (50) is shown at the top of the vertical support. A component (53) is shown at the top of the vertical support. A component (54) is shown at the top of the vertical support. A component (55) is shown at the top of the vertical support. A component (56) is shown at the top of the vertical support. A component (58) is shown at the top of the vertical support. A component (64) is shown at the top of the vertical support.
